CURRENT POSITION:

PRESIDENT,
PROGRAMMING OPERATIONS
iHeartMedia National
Programming Group

You have the "P" word in your title! And you have your fingers in a lot of pies. It looks like the new terrestrial radio model is a lot of 'dot connecting". What can a typical day in your world look like?

What keeps it exciting for me is that every day is different. I have the opportunity to work with an amazing group of talent, programmers, sellers, producers and imagers along with teams running technical operations, digital, social, marketing, podcasting, events, research, communications, contesting, artist relations and many others. Everyone at iHeart works in real time at lightning speed and we try to keep the number of participants in some of our meetings (or Teams calls) to a minimum to ensure they're productive and to be considerate of everyone's time. That said, tight communication and quick follow-through between departments is crucial. I'm amazed sometimes at the speed with which we're able to deliver national and local content to our listeners at a massive scale.

Maybe it's just us but we think Britney Spears should drop a new single like right now. What do you think?

I love that her fans are rallying and supporting her through her personal challenges. It sure seems like the right time, but it usually ends up being about the quality of the song.

If a programmer had no access to the streaming charts, the airplay charts or call-out research, how would she or he make a fast decision for new music to add to a current playlist?

I've always felt that what to add should be more about "instinct" and "fit" and then the data dictates what eventually becomes a hit. There is an art to music curation that goes much deeper than an algorithm on a streaming playlist and that's why a vast majority still say that they discover new music on the radio.

You are the coach of the US Morning Show OlympicTeam. Your participants can be historic or current. The goal: Bronze, silver and gold. Who are your three competitors?

Elvis Duran, Howard Stern and Steve Harvey

Who dresses you? And where on Earth do your get those clothes?

Interestingly enough, my Dad owned a men's retail clothing store in New Jersey when I was growing up and my interest in clothing never materialized until after he sold the business. As a kid, I had plenty of Levi's, Hanes and Nike but more recently, I find myself asking my kids for clothing advice.

DSPs and Satellite have changed consumers music discovery habits. How has this changed radio's music selections and having this data made programming hits easier? And does access to this data make programming hits easier?

Music Lab and Total Audience Appeal data has changed the music decision-making process and our programmers are successfully using this technology every week, not only to improve the music we're playing for our listeners, but to solve some of the limitations of callout research, especially as it relates to new artists and new songs. It helps us identify emerging artists faster than ever before and now, we're able to better track a song's performance and impact in markets all over the country.

You've had an amazing and diverse career. Who has influenced you both personally and professionally?

I was fortunate enough to have the perfect set of mentors when I started my career...Guy Zapoleon taught me everything about the science and research while Dave Robbins taught me about the art of "larger than life" marketing and competition. Over the years, I've had the privilege of working with Steve Rivers, Greg Strassell, Herndon Hasty, Eric Logan, Steve Kingston and more recently Bob Pittman, Rich Bressler, Tom Poleman, John Sykes, Brad Hardin, Marc Chase and Kevin LeGrett. But, all of the aforementioned professionals pale in comparison to my wife Patty, who has always been my #1 fan while keeping me grounded, being without question the greatest Mom who ever lived, raising millions of dollars for kids and families through her development work all while possessing this unmatched ability to light up every room she walks in.

Check out these videos hand-picked by our staff!

BRUNO MARS, ANDERSON, PAAK, SILK-"SKATE"

If a 70's Summer had a theme song it would be this one. "Skate" rolls off the boom box speaker like an Italian Ice cart on a South Philly street corner and gets our wheels turning. The Mars/Paak Silk Sonic collaborative mega cool project remains a MMI favorite. Lace 'em up and click here:

CONAN GRAY - "PEOPLE WATCHING"

MMI Texas Teen Does Well Alert: Conan took that "modern path" to stardom on the interstate called social media. The upload phenomenon caught fire with his home-grown content which led to the uber successful Kid Crow project. In this new clip Conan smokes up the room with a burning butter croissant while daydreaming about love and life. Click here:

KHALID - "NEW NORMAL"

Khalid gives us a futuristic glance with the clip of the amazing ballad "New Normal". Between delivery drones and cosmic houseplants, the look of life seems pretty groovy in the next few years. What remains unchanged is the fact that the dude can sing his rear end off. Khalid's velvety Broadwayish pipes are gonna be around long past flying taxis. Wanna go back to the future? Click here

Video

DRAKE, SMILEY - "OVER THE TOP"

Smiley sure puts one on your face as he recruits Drake for a live assist and takes us "Over The Top". In this clip, it's all here: fancy cars, naked piano girls and diner food; everything you need! If you wanna climb up with us, just click here:

BAZZI - "I LIKE THAT"

Bazzi likes to party and to show us what he likes.! He starts off with a rooftop filled with butterflies and cool gear. But face it, the centerpieces of this video are 2 fold. One: The way trippy skoolie bus loaded with pretty party-goers and Two: The smokin' hot track that is bbllooowwwiinnng up the airplay charts. It's hard to not like that! Click Here:

CHARTS/POWERS:

- **1 AIRPLAY** is calculated by Trailing 14 Days of radio airplay on the Key Influencer radio stations Top 157 radio stations by Average Quarter Hour. Charts are weighted using currently assigned points in Mediabase...100% point value for Morning Drive, 90% for Afternoon Drive, 80% for Mid-days, 70% for nights, 50% for Overnights.
- **2 RETENTION** is calculated by listener Tune-In and Tune-Out using trailing 6 weeks, weighting the most recent week double, and the five weeks prior equally.
- **3 NATIONAL CALLOUT** contemplates more than 1,000 respondents weekly in four regions geographically equivalent over the trailing 14 days of calls.
- **4 STREAMING, AUDIO** contemplates trailing 14 days of all streaming. Songs with insufficient data are designated with an "x". These songs do not affect the Total Performance Score in any way.
- **5 STREAMING, VIDEO** contemplates trailing 14 days of all streaming. Songs with insufficient data are designated with an "x". These songs do not affect the Total Performance Score in any way.
- **6 SALES** is base on 14 days trailing results. Songs with insufficient data are designated as PENDING. Pending songs do not affect Total Performance Score in any way.

HOT ZONE / DEVELOPING

All five components listed above are contemplated. Songs moving up and increasing significantly in TWO or more categories are designated in the Hot Zone. Other new releases are designated as Developing.

RECURRENTS

Recurrents are a simple calculation of songs that have trended downward and no longer qualify for Current status. Trailing 14 days are contemplated, along with 6 weeks of Retention Data, and are computed on a 50/50 level of importance.

ACTION

Songs that are testing either in Callout or in Retention significantly higher than current Airplay rank. These songs are considered UNDEREXPOSED and deserving generally of greater airplay.

STREAMING AUDIO, VIDEO AND SALES

Streaming Audio and Video, and Sales, are based on trailing 14 days data. All major streaming services are used wherever possible, along with sales.

NOTE: Hot AC Callout information is provided as stand-alone information. This data does not factor into the main chart rankings in any way.
